***Allowable Subject Matter***

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-43 are found to be in condition for allowance.

***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose performing an inverse transform by identifying zero patterns in the block to derive zero-pattern information, wherein identifying zero patterns comprises determining the location of zero values or near zero values for multiple rows and multiple columns in the block of transform coefficients, and performing a one-dimensional inverse transform on a subset of the total number of rows and columns in the block of transform coefficients by using the zero pattern information.

It is noted that the closest prior art of record Baker et al. (US 5,150,209) teaches a similar method for coding a digitized picture, however, Baker fails to particularly teach or suggest *"deriving zero pattern information, wherein a step of identifying zero patterns comprises determining the location of zero values or near zero values for multiple rows and*

*multiple columns in the block of transform coefficients, and performing a one-dimensional inverse transform on a subset of the total number of rows and columns in the block of transform coefficients by using the zero pattern information” as specified in the claims.*

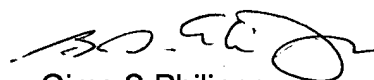

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
